

37 C.F.R. 1.121(c)(1)(ii) ATTACHMENT

35. (Twice amended) A deicing and/or anti-icing agent comprising at least about 10 weight percent based on the weight of (a) and (b) of (a) a hydrocarbyl aldohexose selected from the group consisting of furanosides, maltosides, maltotrioses, glucopyranosides and mixtures thereof; (b) water; and (c) a soluble salt comprising a hydroxyformate salt selected from the group consisting of sodium [carbonate] hydroxyformate, potassium [carbonate] hydroxyformate, sodium [bicarbonate] dihydroxyformate, potassium [bicarbonate] dihydroxyformate and mixtures thereof.

38. (Amended) A deicing and/or anti-icing agent comprising (a) at least about 10 weight percent based on the weight of (a) and (b) of (a) a hydrocarbyl aldohexose; (b) water; and (c) an effective freezing point lowering amount of a hydroxyformate salt selected from the group consisting of sodium [carbonate] hydroxyformate, potassium [carbonate] hydroxyformate, sodium [bicarbonate] dihydroxyformate, potassium [bicarbonate] dihydroxyformate and mixtures thereof.

40. (Amended) A deicing and/or anti-icing agent as defined in Claim 38 wherein said hydroxyformate salt comprises potassium [carbonate] hydroxyformate.

43. (Amended) A method as defined in Claim 42 wherein said hydroxyformate salt comprises potassium [carbonate] hydroxyformate.

45. (Amended) A method as defined in Claim 44 wherein said hydroxyformate salt comprises potassium [carbonate] hydroxyformate.

47. (Amended) A method as defined in Claim 46 wherein said hydroxyformate salt comprises potassium [carbonate] hydroxyformate.

49. (Amended) A method as defined in Claim 48 wherein said hydroxyformate salt comprises potassium [carbonate] hydroxyformate.

56. (Amended) A method as defined in Claim 55 wherein said hydroxyformate salt is selected from the group consisting of sodium [carbonate] hydroxyformate, potassium [carbonate] hydroxyformate, sodium [bicarbonate] dihydroxyformate, potassium [bicarbonate] dihydroxyformate and mixtures thereof.

57. (Amended) A method as defined in Claim 56 wherein said hydroxyformate salt comprises potassium [carbonate] hydroxyformate.

71 (Amended) A method [as defined in Claim 70 wherein said hydroxyformate salt comprises] of deicing or anti-icing a surface, said method comprising applying to said surface a deicing agent comprising (a) at least about 10 weight percent of a hydrocarbyl aldohexose; and (b) an effective freezing point lowering amount of potassium [carbonate] hydroxyformate.
